

## **AlkaPurity™ Ultra System**

**AlkaPurity™ Ultra** is our premium, top-of-the-line residential system. It builds upon the base AlkaPurity™ H-D unit, incorporating two additional brand new water technologies. It features a unique stainless steel Ultra Violet (U.V.) Light chamber that double-disinfects the purified water (after RO processing) against infiltration of biological contaminants. The purified and sterilized water is then processed through our exclusive energized media solution where it is energy infused and given elevated alkaline, antioxidant and other proprietary subtle energies. This purified, micro-clustered alkaline antioxidant energized water is then double-balanced and aligned using our new Dynamic Alignment Technology (DAT System), which is designed to refresh the water's memory and further program and assist the water in its positive energy transfer into the body.

This complete under counter premium energized water system comes with a complete installation kit that includes our beautiful solid brass bar faucet, available in your choice of Polished Chrome or Brushed Nickel. Other faucet finishes are available by special order. The AlkaPurity™ Ultra System comes standard with a 4.4 Gallon Water Storage Tank.

**Only \$1,495**

### **AlkaPurity™ Ultra Unit Dimensions**

- Main Unit: 20" Tall, 15" Wide, 9.5" Deep.
- 4.4 Gallon Tank: Diameter is 11"; Height is 14"
- 2.2 Gallon Tank: Diameter is 8"; Height is 13".
- The capacity of each tank is approximately half of what it is rated because the rest of the space in the tank is occupied by a pressurized membrane.
- Installed faucet is approximately 12" tall.

Tank may be installed lying down on its side if preferred.
