

The AlkaRev

At last, a truly beautiful, non-electric water ionizer that produces delicious energized, alkaline water for only **\$495!**

Non-electric – unit is turned on when water is directed via the diverter to the unit, and turns off when the flow of water is stopped. Water is both diverted to and returned to the tap – there is no faucet on the unit.

Filter Life Alert – Advanced digital control circuit:

- **Blue screen** indicates remaining filter capacity / **Red screen** (and audible alert) indicates that it is time to replace the filter cartridges.
- Low battery alert –blinking symbol indicates 2 AAA batteries for digital screen need replacement.

The AlkaRev™ features Water-Revolution's state-of-the-art filtration, customized to your specific needs whether your source water is Municipal or Well/Natural.

Water-Revolution's proprietary Energized Media Blend creates the water's *energy shift* and produces great tasting, naturally created micro-clustered, high antioxidant alkaline water. The proprietary blends of rare ceramic materials including Far-Infrared ceramic balls, Vitamin C, calcium and tourmaline greatly intensify the pH of the finished water while decreasing the water's Oxidative Reduction Potential (ORP).

Each AlkaRev™ filter set will produce approximately 1,000 gallons of water. (As water quality varies greatly, this number can range from 750 - 1,500 gallons. Ultimate life of filters depends on quality of source water and other issues including the amount of water processed). We suggest average use filter replacement every 6-12 months to assure excellent water quality.

The AlkaRev™ filter Replacement Cartridge Set includes two cartridges (an AlkaAmpensity™ energized media cartridge and your choice of a MuniProtect™ or WellProtect™ cartridge) for \$149.
